Protecting Home and Business

- As thefts have been increasing, **residential security** is very important .
- At home, you need to make sure that all doors are secured with high security locks.
- For the best possible security against break-ins, a quality burglar alarm is a deterrent to all.

Protecting Home and Business

Tips for Residential Security

- Install peepholes in exterior doors so you can see who comes to your door.
- Set up security lighting around the outside of your home, especially at side and rear doors and windows. Floodlights, which offer the brightest lighting, are the best deterrent to prowlers.
- Prune tree limbs away from your home to avoid easy access to upstairs windows.
- Never leave a spare key outside your home. Most hiding places are obvious to intruders.

Protecting Home and Business

Tips for Residential Security

- Make sure that all personal belongings such as barbecues and sports equipment are stored inside your house or garage when not in use.
- If you go away for a few days, stop your mail and newspaper delivery. Ask a neighbour or friend to watch your home and take care of your yard to eliminate signs of absence.
